-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS 30-32 ARE PENDING

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Greller et al (Greller), Us 2002/0006612, 17 January 2002.**

Greller is directed to identifying exceptional data patterns [0002].

As to **claim 30**:

*A computer based method for mining a plurality of experiment information for a pattern, said method comprising:*

*collecting information from experiment;*

*gathering information about at least one of a plurality of groupings for said experiments to be mined;*

Greller uses data sources that correspond to experimental data gathered in a searchable library [0030]-[0032].

*adding attributes to the information from experiments;*

Greller teaches that data sources can add attributes, such as source quality weights, to the information [0033], [0034].

*mining transformed information;*

Greller's methods are applicable to data mining of large expression databases [0039].

*displaying the results of the mining; and  
saving the results of the mining.*

Displays of the results are depicted in the figures [0012].

As to **claim 31**, Greller avoids the use of normalized data sources that skew the results, but this exclusion is relaxed if the entire source has been treated in the same way, implying that it normalizing methods can be used.

As to **claim 32**, the method is applied to microarray data analysis [0030].

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Amsbury whose telephone number is 571-272-4015. The examiner can normally be reached on M-F 6-18:30 FIRST WEEK.
